PLANET PASSIONATE

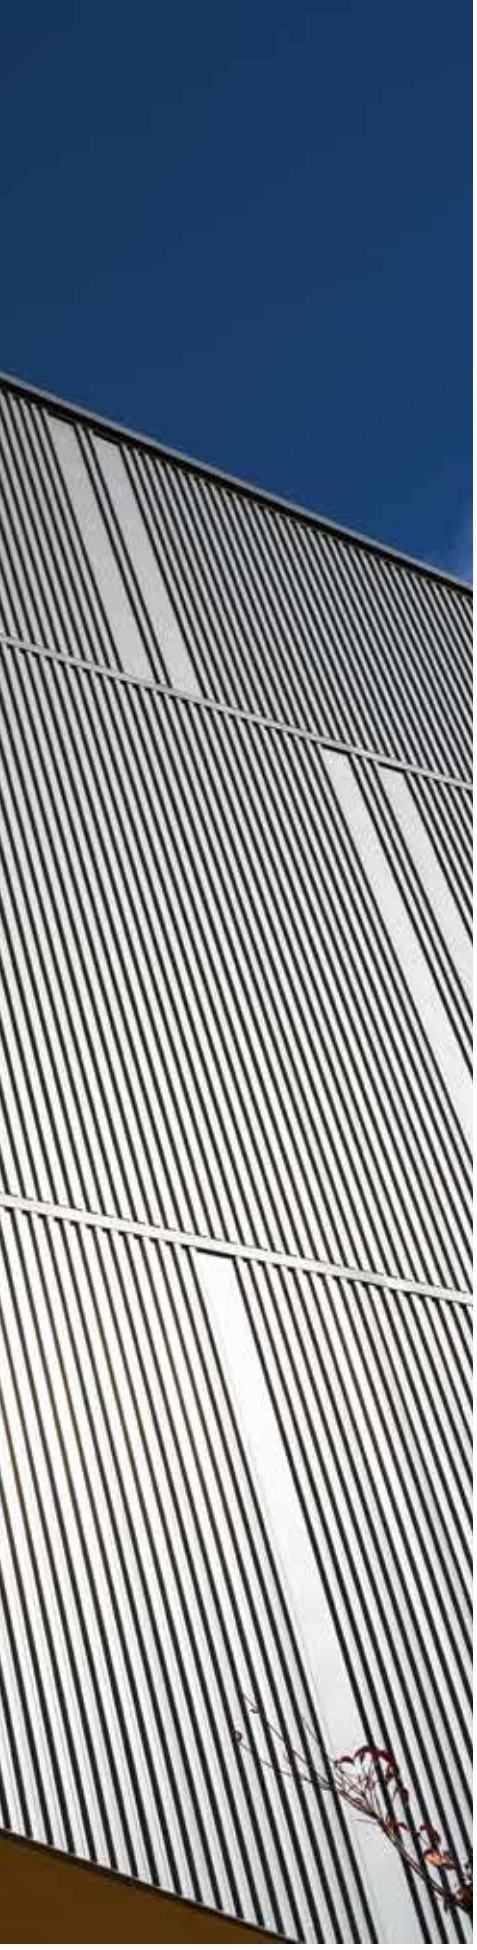

Morin® By Kingspan

Morin specializes in roll forming of architectural heavier gauge single skin metal wall and roof systems.

With over 100 profiles and multiple manufacturing locations, Morin is well positioned to produce for any size project.

Morin is constantly adding new products. Please visit us at MorinCorp.com to see the latest product offerings.

ADDITIONAL COLOR OPTIONS

Paint Systems

Application, location, and budget are all important factors to consider when selecting the paint system that is best for your project. Morin is here to guide you through all the options and make the process as simple as possible.

- Applications: Exterior metal building components, walls and roofing, composite panels, curtain walls
- Superior weathering / UV resistance
- Excellent chalk, fade and stain resistance
- Softer finish that can be modified through formulation – AAMA 2605 rated

Fluropon 70% PVDF metal coating system from Sherwin Williams offers a range of advantages that make it a preferred choice for various applications. Firstly, its 70% polyvinylidene fluoride (PVDF) composition provides exceptional durability, ensuring long-lasting performance in harsh environments.

The coating system exhibits superior resistance to UV radiation, extreme weather conditions, and chemical exposure, thereby maintaining its vibrant color and gloss over an extended period.

Fluropon 70% PVDF also offers excellent abrasion and corrosion resistance, protecting the underlying metal substrate from damage. Moreover, the coating system boasts exceptional color retention, reducing the need for frequent maintenance and repainting.

With its advanced technology and exceptional performance characteristics, Fluropon 70% PVDF metal coating system ensures enhanced aesthetics, durability, and longevity for a wide range of architectural and industrial applications.

Custom Color Matches

Achieve virtually any tint, shade or finish quickly and accurately.

Morin makes it easy to add visual distinction and protection to your next project. To get started, contact us today.

Additional Information

- Check with your Morin representative for warranties and specifications for different paint systems.
- Colors in this brochure are representations of the actual color and should be used solely for design guidance. Physical metal color chips are available upon request.
- All finish options available for all panels.

DIGITAL PRINTING TECHNOLOGY

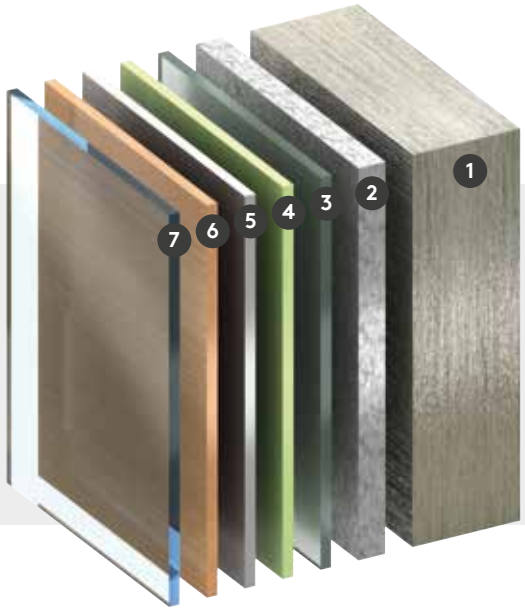

INNOVATIVE HIGH-DEFINITION DIGITAL PRINTING PROCESS FOR STEEL COILS.

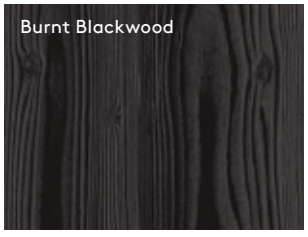

High-resolution images of natural materials such as wood or stone are printed directly to the steel sheet using proprietary large-format digital printing techniques. The result is stunningly realistic, allowing our end users to entirely replace wood, stone, or vinyl siding with this durable steel product without compromising on appearance.

- Made in the USA
- Custom and standard options
- Authentic, non-repeating patterns up to 32 feet long
- High-definition, 400 dpi printing
- Realistic patterns
- Up to 93% recycled content
- Up to 20 years warranty

1. Cold rolled steel base
2. Galvanized/Galvalume® coating
3. Pretreatment
4. Primer coat
5. Top coat
6. High definition image
7. UV protective clear coat

NATURAL DURABILITY OF ZINC METAL

Organic metal with a natural patina, long lasting, used as durable roof and wall material for centuries.

Zinc is a highly durable and sustainable material with a shiny, semi-bright finish that develops a protective, dull grey patina over time, it is an abundant element found in Earth's crust and is 100% recyclable.

Zinc also requires less energy for production than other metals due to its lower melting point and is highly resistant to corrosion requiring little or no maintenance.

The zinc colors and finishes shown in this brochure represent a curated selection. For the full range of available zinc colors please visit:

ANODIZED ALUMINUM

Create a unique and stylish finish with unmatched corrosion resistance.

For a premium, timeless look, anodized aluminum delivers varied natural tones that enhance the building's appeal over time and offers many inherent benefits including, cost and production efficiencies, beauty and versatility. Our anodized finishes come with a surface warranty of up to 70 years, ensuring long-lasting performance and beauty. These finishes bring versatility and enduring quality to every architectural design. Bring your design vision to life, select from a wide array of standard colors or request a custom color match to create a unique aesthetic. Extensive color range available, contact us.

The anodized finishes shown in this brochure represent a curated selection. For the full range of anodized aluminum colors, please visit Lorin Industries.
